Name: Hong Channy

Answer

1. AI stands for Artificial Intelligence. It refers to the simulation of human intelligence in machines that are programmed to think and learn like humans, including tasks such as problem-solving, decision making, and language understanding.

2. AI can do:
   - Translate
   - Robot
   - Artificial Narrow intelligence
   - Artificial General intelligence
   - Artificial Super intelligence
   - Speech Recognition

3. There are many benefits of AI, including
   - Increased Efficiency
   - Improved Accuracy
   - Cost Savings
   - Personalization
   - Better Decision Making
   - Enhanced Safety
   - Improved Customer Service
   - Innovation

4. AI is risky as:
   - Automation-spurred job loss
   - Socioeconomic inequality
   - Privacy violations
   - Uncontrollable self-aware AI

5. One specific project in the field of AI is the development of autonomous vehicles. Autonomous vehicles are equipped with various sensors, cameras, and other.
